

Are you ready for the green and digital transition?

The twin digital and green transition of manufacturing industries will require large investment on innovation, but firstly reskilling its workforce is essential for the success of this twin transition.

The project

The TwinRevolution project offers essential online training resources to support the challenges of climate change and the digital transition

Project partners

Vaasan yliopisto
UNIVERSITY OF VAASA

Co-funded by
the European Union

www.twinrevolution.eu

Course structure

The future online training course is divided in 4 training modules, with a total of 50 learning hours.

- 1.Twin transition introduction: towards a green and smart manufacturing industry
- 2.Circular economy applied in the manufacturing industry
- 3.Industry4.0 technologies in the manufacturing industry
- 4.Twin green and digital transition

The TwinRevolution e-learning, free and open to anyone interested, will be available in 2024
